General Report Comments:

Document No: 1137736

Validation Date: 25 January 2024

Identification

Mineral Type: Natural Beryl
Variety: Emerald

Transparency: Transparent
Color Description: Green

Carat Weight: 5.40 cts
Measurements: 14.93 x 10.28 x 6.80 mm

Shape: Pear
Cutting Style: Modified Brilliant Cut

Comments:

Identification

American Gemological Laboratories™
America's first and most highly respected origin lab.

Founded in 1977,
AGL is an internationally recognized gemstone
testing facility, specializing in comprehensive
colored stone analyses.

AGL has the distinction of being the
first laboratory in the United States to issue
Country-of-Origin reports. Our company and its
principals have a long tradition of research into the
detection of and reporting on gem identification-
and-classification, gemstone treatments and
provenance determinations.

Our staff is composed of experts in the field
of gemstone testing and reporting. Our findings
reflect the latest knowledge and analytical
techniques to ensure the highest standards
are applied on every stone we test.

AGL's testing and reporting
methodology provide you with unsurpassed quality
and reliability. We are committed to providing
the highest level of service and reporting
that our clients and the industry have
come to expect from the AGL.

Origin

Provenance: Colombia

Comments: Based on available gemological information, it is the opinion of the
Laboratory that the origin of this material would be classified as
Colombia.

Origin

Enhancement

Standard: Clarity
Degree: Minor to Moderate
Type: Modern

Additional: None

Stability Index: Very Good to Good

Comments: This gemstone contains fissures which at the time of testing were only partially filled.
Emeralds are commonly clarity enhanced to reduce the visibility of fissures.
Today, modern types of materials used to clarity enhance gemstones include
various polymer-type resins, singly or in combination with other types of fillers.

Enhancement
